RE: Discontinuation of Series 83 Electric Actuator

The Series 83 Electromni[®] has been a staple in the Asahi/America valve and actuation catalog for nearly four decades. While the product had been successful for many years, and set a standard for electric actuation in the thermoplastics space, the recent introduction of Asahi/America's Series 19 robust package offers an updated technology to the market.

Therefore, it has been determined that the Series 83 Electromni[®] product has reached its natural end of life and will be discontinued.

Effective 9/1/2023 the Series 83 Electromni[®] will no longer be available for purchase.

Replacement Product:

The Series 19 Com Pack[®] is the direct replacement for the Series 83. The Series 19 offers more to the market in standard features, flexibility of options, and includes our industry leading 3-year warranty.

Standard features include:

- Multi-voltage capability
- More valve options
- Capacitor Failsafe Option
- Manual Override
- Visual Position Indication, including LED and domed beacon

Product Support:

The Series 19 is readily available for purchase, and documentation is easily accessed through our website at www.asahi-america.com

Please contact Asahi/America's Technical Services personnel for any questions or concerns that may arise during this transition at 800-343-3618 or asahi@asahi-america.com.
